We are

We Think Big

We change habits and lifestyles with our trend products developed by our high-tech R&D

We are universal

We are a global-minded domestic brand. We produce in our 40.000 m2 factory in Manisa OSB and present it to the Turkish and World markets.

We are different

We are thinking otherwise. We change the surface usage habits with awareness that we create.

We are reliable

We show that we are open to co-operation for the execution of the projects. We take care to be honest and transparent.

We are intelligent

We are not dreamers, we are pragmatic. We conclude projects, design and implementation and high performance.

We are participants

We adopt a participatory mode of communication with our customers, our suppliers and our employees.

We are always one step ahead

The value we create comes from our global awareness and our rich diversity. We give fast, most effective response to changing priorities.

We want more

By taking the necessary risks and managing them correctly, we reach our operational goals.

We are green!...

We are green, from raw to production riding. Our productive love is inspired, from our nature and human love ...

Life is
so easy
with Belenco®

Easy to clean, adds comfort to life

Rendering extremely strong and durable natural quartz mineral in a combination of exceptional artwork and engineering, Belenco produces fascinating quartz surfaces with contemporary designs and state-of-the-art technology. Belenco manifests itself as a strong and stylish surfacing material with high abrasion, scratch and chemical resistance. It is easy to clean and adds comfort to life with the ease of use it presents.

Always hygienic

Thanks to its nonporous and non-water-absorbent structure Belenco's compact nature allows no micro-organism growth making it absolutely hygienic. Belenco Quartz Surfaces have been approved by NSF and certified by NSF51 hygiene certification for safe food preparation, therefore there is no need to use disinfecting cleansers.

No permanent stains

Belenco employs the cutting edge technology to produce quartz surfaces comprising of 93% natural quartz and 7% binder and inorganic pigment in formulation with a non-liquid absorbent and nonporous structure making it resistant against dirt. Aggressive effects of chemicals are no longer a problem for Belenco Quartz Surfaces thanks to the inherent quartz mineral. Substances like tea, coffee, wine, vinegar, lemon and colored spices, which could permanently stain other type of countertops or cause wear on their surfaces, do not affect Belenco. There is no need to seal or wax Belenco Quartz Surfaces.

Maintains natural shine

Belenco retains the natural sheen of quartz mineral without any need for sealing or waxing. Belenco maintains its first day luster and natural brightness for long years by the help of a simple daily cleaning.

Displays luster as the first day with a simple cleaning

A wet cotton cloth and a soft neutral liquid detergent (window cleaners or hand-dishwashing liquids) are enough for daily cleaning. Should you wipe out any spills and left-overs from the surface before drying out and turning into permanent stains, you can preserve the first day lustrous outlook for long years. Rinsing well the surface with sufficient amount of water after having cleaned with a neutral detergent is important both for your health and long term protection of the natural outlook of the surface.

Routine Cleaning	A wet cotton cloth and warm water
Gentle Stains	Neutral daily cleaning detergents (Mr Muscle, Cif window cleaners, Daisy, Dettol, Cillit Bang kitchen cleaner sprays)
Heavy, dried stains	Gel detergents with bleach (Domestos Ultra Thick Bleach, Clorox Clean-Up with Bleach, Mr Muscle Spray, Ajax Spray & Wipe)
Lime Stains	Cillit Bang Power Grim & Lime, Lysol Power, Lime-A-Way lime, calcium & rust cleaner spray
Rust Stains	Cillit Bang, Mr Muscle Kitchen Spray, Lime-A-Way lime, calcium & rust cleaner spray

We recommend

A wet cotton cloth and warm water are enough for the daily cleaning of your Belenco countertop. In cases where you have to use detergent, prefer neutral daily cleaning agents. Before using a cleaning agent, certainly remember to read and observe the producer's instructions. Rinse the surface thoroughly with water after cleaning.

Lime, soap residues and water marks

Use low concentration household lime removers in getting rid of such stains. Observe producer's directions for use. Rinse off the surface with plenty of water after treatment.

Stains hard to remove

Dried stains and spills are hard to remove and need you spend more effort. Therefore you should clean out the dirt and stains on your countertop before they dry out. Use a plastic spatula to get rid of the stains hard to remove such as dried food left-overs and drink spills, residues of hair dyes, nail enamels, adhesives and paint spills. First gently scrape away the stain with a plastic spatula and then clean out the surface with a soft cloth and a neutral liquid detergent. Pay attention not to use cleaners containing abrasive particles. For stubborn stains, apply the detergent directly onto the spill only and then gently scrub out with a cleaning sponge. Rinse the surface well with sufficient water after cleaning.

Rust and Oil Stains

Avoid letting any spills of rust or heavy oil dry out to turn into stubborn stains. Yet in such a case, you must use oil or rust removal products and remember that such are strong chemicals damaging the surface. Therefore you must be very careful in applying such products. These products with high pH degree must be applied onto the stain only and rinsed off with sufficient amount of water within the shortest time. Should such products remain on the surface for a long time or fail to be rinsed off well, they can result in discoloration or surface defects in Belenco.

Easy to maintain the first-day beauty for years long

Use a cutting board

Belenco retains the supreme qualities of the inherent quartz. As one of the hardest mineral stones in nature, the most important merit the natural quartz has to offer Belenco is the high abrasion and scratch resistance. Belenco is a countertop material with the highest scratch resistance. Yet, remember not to use cutlery directly on Belenco. Pay attention to use a cutting board in order for your countertop to preserve the first day beauty.

Use a trivet or a hot pad

Although Belenco has a higher heat resistance when compared to other countertop materials, it can be affected by heat changes. Therefore, it is absolutely a must to use a trivet or a hot pad and not to put a hot container directly on Belenco after having taken out from the cooker or oven. Do not place any heat emitting kitchen appliance (electric toasters or cookers, etc.) directly on the countertop.

Keep in mind!

Please consider the following points in order for you to enjoy your Belenco countertop with the first day luster and beauty for long years:

- Don't let stubborn stains dry out on your countertop. Cleaning out such kind of stubborn stains as soon as possible will make you use less chemical substances and shorten your cleaning time.
- Avoid using cleaning agents with high pH degree as much as possible. Should you obviously have to use them, apply directly onto the

stain only and rinse off with plenty of water in the shortest time.

- Strictly avoid using powder or cream detergents with abrasive particles. Prefer gel products. In the same way, avoid using hard cleaning tools (wire scrubbers, sponges with abrasive surface, etc).
- Never apply any bleaching agents, paint strippers or thinners (chemicals such as tetrachloroethane or methylene chloride) on your countertop. Strong bases with pH degree higher than 8.5 and acids with very low pH degree such as spirits of salt cause your countertop fade out its color and make its smooth surface deformed.
- Never place any containers taken out from the cooker or oven directly onto your countertop. Always use a trivet or a hot pad.
- Some cooking methods cause heat reflection making it reach out onto the counter and accumulate to damage the surface. Always place your pots and pans centered on the appropriate part of your cooker.
- Never use cutlery such as knife directly on your countertop, prefer using a cutting board.
- Avoid dropping or falling off any heavy objects onto the countertop. Pay attention to prevent objects from damaging the countertop surface or its edges (scratching, cracking, chipping).
- Belenco retains the radiance of the inherent natural quartz. Therefore, never apply Belenco surfaces any waxes or sealants. Belenco surfaces can be polished only under factory circumstances. Any kind of polishing or honing to be done thereafter will damage your Belenco quartz surface beyond repair.

There are
many
reasons to
choose
Belenco®

There are many reasons to choose Belenco ...

Our Advantages

Quartz; The most robust, functional, precious natural stones of nature. It's very hard. It has high abrasion and scratch resistance. It shows high resistance against the abrasive effects of chemicals. Belenco is much more advantageous than other surface materials with 93% natural quartz mineral.

Natural Beauty

Belenco quartz surfaces have unmatched durability and unique natural beauty thanks to extremely strong and durable/stable natural quartz mineral and superior/high- quality polymer resin inherent at a rate of nearly 93% in its composition.

Quartz Brightness

Belenco Quartz Gloss is obtained with natural shine of natural quartz particles. The shine does not contain any chemicals. Then the surface does not need to be polished or polished.

Fashionable Spaces

Belenco Quartz Surfaces give life to top quality, most fashionable and elegant quartz surfaces respecting the world standards as well. What is fashionable in living spaces is the quartz, and what is fashionable in quartz is the Belenco Quartz Surfaces.

Strong

The natural quartz, an extremely strong and durable material, combines with excellent design and technology in Belenco Quartz Surfaces to form a surface material with high resistance against erosion, scratches and impacts.

Resistant to Chemicals

Belenco Quartz Surfaces are highly resistant to corrosive effects of acids and bases. Corrosive effects of detergents are no more a problem for Belenco Quartz Surfaces.

Resistant to Dirt

Non-water-absorbent and nonporous structure of Belenco Quartz Surfaces is not affected by substances such as tea, coffee, wine, mustard, vinegar or lemon that would permanently cause stain or abrasion on other type of worktop materials. There is no need to apply any surface protection to Belenco Quartz Surfaces.

Hygienic

Nonporous and compact structure of Belenco Quartz Surfaces does not allow any bacteria or other micro-organism growth. NSF approved hygienic qualities make Belenco totally safe for food preparation.

Same as the first-day

Belenco Quartz Surfaces preserve the first-day strength, sheen and unique outlook for years long and do not require any special care and maintenance.

Nature Friendly

Belenco Quartz Surfaces are nature friendly as they add value to quartz, show resistance against wear and tear, reduce cleaning expenses and make investments to recycling technologies.
